

OREGON®

# Guide Bars

## Professional

Loggers, arborists, orchardists, millwrights, forestry workers, and other highly skilled woodcutters require guide bars designed for the demands of their tough professions. Oregon® makes guide bars that are strong, durable, and reliable, and our state-of-the-art LubriTec oiling system promotes a long lifespan. You demand top performance from your tools. Oregon guide bars are designed to make your work day easier and more efficient - for every environment imaginable.

## SpeedCut™ Guide Bars

Narrow kerf

.325"

BEST

SpeedCut guide bars pair with SpeedCut 95TXL chain to create the next-generation narrow kerf system on midsize chainsaws. Designed to deliver faster cutting and reduced weight compared to standard cutting systems. Important Note: Always use SpeedCut narrow kerf chain in combination with SpeedCut or other narrow kerf bars.

### Features & Specs

#### Lighter

- Up to 20% lighter, for more control and less fatigue with a light-weight aluminum core

#### Stronger

- Stiffer and stronger with aerospace bonding technology

#### Longer Lasting

- More durable on the job, from a redesigned nose with new parts and materials. Harder bar rails designed to last longer

#### Better Chain Retention

- Precision rail groove design means better chain retention and less wear

#### LubriTec™ Lubrication System

- Keeps your saw chain drive links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 13-20"

SpeedCut™ previously known as Pro-Lite®

## VersaCut™ Guide Bars

.325"

3/8"

BEST

VersaCut guide bars are made for tree-cutting professionals who encounter all types of wood. Their aluminum core makes them strong, light-weight, and easier to maneuver. VersaCut guide bars are standard kerf, with a larger radius nose and feature a harder rail.

### Features & Specs

#### Versatile

- Stiffer and stronger bar delivers precision cutting
- Better balance for when you need to use a smaller saw

#### Longer Lasting

- Debris shield provides durability in challenging environments
- New sprocket nose system promotes a longer nose life

#### Lighter Weight

- New aluminum core is 20% lighter than the previous Pro-Lite guide bar
- Lighter weight leads to reduced operator fatigue

#### Better Chain Retention

- Precision rail groove design means better chain retention and less wear

#### LubriTec Lubrication System

- Keeps your saw chain drive links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 13-24"

## ControlCut™ Guide Bars

.325"

3/8"

BEST

ControlCut guide bars are designed for a mix of light-duty and tough jobs. ControlCut gives you the freedom to use one tool, rather than three or four. A variety of enhancements include lighter weight due to the aluminum core, while maintaining a harder rail, and stronger bar.

### Features & Specs

#### Precision

- Make smoother, more precise cuts with the stiffer bar
- Smaller radius nose reduces kickback for greater precision

#### Long Lasting

- Debris shield provides durability in challenging environments
- New sprocket nose system promotes a longer nose life

#### Light Weight

- New aluminum core is 20% lighter than the previous Pro-Lite guide bar
- Lighter weight leads to reduced operator fatigue

#### Better Chain Retention

- Enhanced rail groove design means better chain retention and less wear

#### LubriTec Lubrication System

- Keeps your saw chain drive links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 13-18"

VersaCut™ previously known as Pro-Lite®

## PowerCut™ Guide Bars

.325"

3/8"

.404"

BEST

PowerCut guide bars are strong, durable, light-weight, and long-lasting. The chrome-moly body is super-tough, and the replaceable nose promotes a long lifespan. PowerCut guide bars pair perfectly with the 70-Series EXL saw chain.

### Features & Specs

#### Stronger

- Super-tough chrome-moly body and rails resist chipping

#### Durable

- Longer nose takes more abuse, minimizing wear to the body

#### Replaceable Bar Nose

- Eliminates need to purchase new bar, and the nose fastens easily with a single rivet

#### LubriTec Lubrication System

- Keeps links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 13-42" (33-107 cm)

PowerCut™ previously known as PowerMatch®

BEST

## DuraCut™ Guide Bars

.325"

3/8"

.404"

BEST

DuraCut guide bars are designed for abrasive and challenging environments. DuraCut's chrome-moly body and stellite alloy nose provide ultra high-wear resistance, longevity, and power.

### Features & Specs

#### Powerful

- Super-tough chrome-moly body is stronger than standard bars

#### Long Lasting

- Sprocket-less stellite alloy nose delivers longevity and durability in abrasive environments

#### Tougher Bar Rails

- Bar rails are designed to resist chipping, even in the toughest environments

#### LubriTec Lubrication System

- Keeps your saw chain drive links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 16-42"

DuraCut™ previously known as ArmorTip®

## Occasional User

Homeowners and other occasional users prize simplicity and reliability for garden work. You need a tool that can cut a stubborn tree or make that Saturday set aside for garden pleasant and satisfying. Oregon® guide bars like the AdvanceCut were designed with occasional users in mind.

## AdvanceCut™ Guide Bars

3/8" Low Profile

.325"

3/8"

The AdvanceCut guide bar is durable and easy-to-maneuver, with added versatility.

### Features & Specs

#### Versatile

- Available in models with the Intenz tensioning mechanism built into the bar, and/or with holes for the Guard Mate tip guard

#### Durable

- Multi-rivet nose promotes long-lasting durability

#### Light Weight

- Slim symmetrical contour is light weight, easy to maneuver, and reversible

#### LubriTec Lubrication System

- Keeps your saw chain drive links and rivet joints oiled for less wear and longer life

#### Bar Lengths

- 12-24"

PowerCut™ previously known as PowerMatch®

## Single Rivet Guide Bars

3/8" Low Profile

1/4"

GOOD

Single rivet guide bars are designed with maneuverability and ease in mind. They make working on your property quick and easy by using premium light-weight technology that is made to last.

### Features & Specs

#### Light-Weight

- Slim and symmetrical contour means a lighter guide bar
- Small nose-radius reduces kickback and improves maneuverability

#### Versatile

- Some models can be fitted with high quality add-on features such as PowerSharp® and Guard Mate®

- Intenz single rivet guide bars include a built-in chain tensioning mechanism

#### Fit-Up

- Bar lengths 8 to 18"
- Recommended Saw Sizes: up to 2.5 in (41 cc)
